## ACCESS SERVICE

### 4. SWITCHED ACCESS SERVICE (Cont'd)

#### 4.7 Rate Regulations (Cont'd)

##### 4.7.8 Mileage Measurement (Cont'd)

The Tandem Switched Local Transport Facility mileage rate is shown in 5.6.1 following in terms of per mile per access minute. To determine the rate to be billed, first compute the mileage using the V & H coordinates method. If the calculation results in a fraction of a mile, always round up to the next whole mile before determining the mileage. Then, multiply the mileage by the appropriate Local Transport Facility rate. The amount to be billed will be the product of this calculation (i.e., the number of miles multiplied by the per mile rate) multiplied by the number of access minutes.

The Direct Trunked Transport Channel Mileage rates are shown in 5.6.1 following in terms of fixed and per mile per month. To determine the rate to be billed, first compute the mileage using the V&H coordinates method. If the calculation results in a fraction of a mile, always round up to the next mile before determining the mileage, then multiply the mileage by the appropriate Channel Mileage rate. The amount to be billed shall be the product of this calculation plus the appropriate fixed Channel Mileage rate.

When Hubs are involved, mileage is computed and rates applied separately for each section of the Channel Mileage, i.e., serving wire center of customer premises to a Hub, Hub to end office and/or Hub to Hub.
