Leaf: 175
Revision 0
Superseding Revision:

ACCESS SERVICE

5. RATES AND CHARGES, (Cont'd)

5.2 Rate Categories, (Cont'd.)

5.2.5 Billing of Access Minutes, (Cont'd.)

For terminating calls over FG Access with SS7 signaling, the measurement of access minutes begins when the terminating recording switch receives the initial address message from the terminating End User. On directly routed trunk groups or on tandem routed trunk groups, the Company switch receives the initial address message and sends the indication to the Customer in the form of an answer message. The measurement of terminating FG Access call usage ends when the entry switch receives or sends a release message, whichever occurs first.
