

AT&T Communications of New York, Inc.
P.S.C. No. 26 -- Telephone
Private Line Local Channel Services
Effective Date: December 1, 2013

Section 8
Leaf No. 1
Revision: 1
Superseding Revision: 0

SECTION 8 - ACCUNET GENERIC DIGITAL ACCESS SERVICES¹

(C)

- 8.1 GENERAL - An ACCUNET Generic Digital Access Service provides for the transmission of digital signals at 9.6 kbps and either 56 or 64 kbps. The transmission of digital signals at 64 kbps for ACCUNET Generic Digital Access Service is not presently available but will be offered upon the availability of this service offering from the Local Exchange Company.
- 8.1.1 Description - An ACCUNET Generic Digital Access Service provides a digital channel for the two-way simultaneous transmission of signals at the rates of 9.6 kbps, 56 kbps or 64 kbps in a framed DSO signal format. The transmission specification standards for ACCUNET Generic Digital Access Service are contained in Technical Publications-PUB 62310 and PUB 62421 (see Technical Publication Information, Preface).
- An ACCUNET Generic Digital Access Service may be furnished (1) between a Customer's premises and an AT&T central office or (2) solely as an Access Coordination Function. An ACCUNET Digital Access Service may not be used with DATAPHONE Digital Service.
- 8.1.2 Regulations - In addition to the regulations in Section 2 of this tariff, the following apply.
- A. Availability of a Local Channel Service - ACCUNET Generic Digital Access Services are available from the AT&T central offices listed in the AT&T Business Service Guide. ACCUNET Generic Digital Access Services may not be available in every LATA.
- B. Credit Allowances for Interruptions - For purposes of determining credit allowances in accordance with the regulations in 2.6 preceding, an ACCUNET Generic Digital Access Service is considered to be interrupted when:
- there has been a loss of continuity, or
 - 300 or more seconds of transmission containing errors occur in a 15-minute period.

¹ Effective December 1, 2013, customers may not establish new term plans of any length for Intrastate Private Line Service at speeds of T45 (45 Mbps) and below, and existing term plans may not be renewed. For new service, or for existing service after any term plan expires, service will be provided only on a month-to-month basis.
