
SECTION 5.0 — MISCELLANEOUS SERVICES AND RATES (Cont'd)

5.5 Custom Calling Features

The features in this section are made available to Residential Customers on a per use basis. All features are provided subject to availability. Customers may utilize each feature by dialing the appropriate access code. The Customer will be billed the per feature activation charge shown in the table below each time a feature is used by the Customer. Transmission levels for calls forwarded or calls placed or received using optional calling features may not be acceptable for all or some uses in some cases.

5.5.1 Feature Descriptions

Call Forwarding — Fixed, Busy Line No Answer — This feature, when activated, redirects attempted terminating calls to another Customer-specified line. Call originating ability is not affected by Call Forwarding — Fixed, Busy Line No Answer. The calling party is billed for the call to the called number. If the forwarded leg of the call is chargeable, the Customer with the Call Forwarding — Fixed, Busy Line No Answer is billed for the forwarded leg of the call. Calls cannot be transferred to an International Direct Distance Dialing number.

Speed Calling — This feature allows a user to dial selected numbers by means of an abbreviated code. This feature is available in either an 8 number or a 30 number capacity. The Speed Calling list can only accommodate a number consisting of 15 digits or less.

Caller ID - Allows a Customer to see a caller's telephone number previewed on a display screen before the call is answered. Caller ID requires the use of specialized CPE not provided by the Company

Caller ID with Name — Allows a Customer to see a caller's name and number previewed on a display screen before the call is answered. Caller ID with Name requires the use of specialized CPE not provided by the Company.

Call Forwarding — A Customer activated feature that automatically transfers all incoming calls from the Customer's telephone number to another dialable telephone number until the Customer deactivates the feature. If forwarded to a long distance number the Subscriber will incur the long distance charges.

Call Trace — Allows a called party to initiate an automatic trace of the last call received. Call Trace is available on a usage basis only.

Call Blocking — Allows Customer to block calls from different telephone numbers. A screening list is created by Customer either by adding the last number associated with the line (incoming or outgoing) or by pre-selecting the telephone number to be blocked. Callers from such numbers hear an announcement that the calling party is not accepting calls and Customer's phone will not ring.
