
SECTION 4.0 — BASIC SERVICES AND RATES

4.1 Call Timing for Usage Sensitive Services

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

4.1.1 Calls are measured in durational increments identified for each service. All calls which are fractions of a measurement increment are rounded up to the next whole unit.

4.1.2 Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s).

4.1.3 Timing terminates on all calls when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carrier.

4.2 Distance Calculations

The Company does not offer distance sensitive services.

4.3 Rate Periods for Time of Day Sensitive Services

The Company does not offer time of day sensitive services.
