SECTION 3 - DESCRIPTION OF SERVICE AND RATES (Cont'd)

3.3.   ISDN Primary Rate Interface Service (Cont'd)

    3.3.1   General (Cont'd)

        3.   The number of telephone numbers associated with an ALEC Primary Rate ISDN arrangement must be equal to, or less than, the number of PRI Interfaces comprising the arrangement and all numbers must use the same routing unless the customer subscribes to additional numbers as stated in Section 4.3.5 of this Tariff.

        4.   DNIS and Hunting are inherent to the service.

        J.   ALEC Primary Rate ISDN Extended Reach Service (ERS) is designed to "extend the reach" of the PRI from a centrally located metropolitan local calling area into areas of the LATA which are "non-local" to the metropolitan area. Customer must purchase telephone numbers within each desired "non-local" calling area to allow their clients to call them without incurring intraLATA Long Distance Message Telecommunications Service charges.

    3.3.2 Regulations

        K.   A termination liability charge is applicable if service is terminated prior to expiration of the contract. The applicable charge is dependent on the contract period and will be equal to the number of months remaining in the contract times the monthly rate provided under the contract.

        L.   The minimum subscription period for which month-to-month PRI service is furnished and for which charges are applicable is one month.

        M.   CPE that is compatible with PRI service interface is the responsibility of the customer.

        N.   Suspension of service is not allowed.

    3.3.3 Definitions

        D-Channel
        A 64 Kbps digital signaling only channel for call establishment when used with PRI service.

        Digital Data Only B-Channel
        The term "Digital Data Only B-Channel" denotes a bi-directional synchronous channel capable of supporting 64 Kbps of digitally transmitted data mode calls when provisioned by the ALEC Primary Rate ISDN-Digital Data Only option.
