COMPANY: KEYSpan GAS EAST CORP. DBA BROOKLYN UNION OF L.I. REVISION: 7
INITIAL EFFECTIVE DATE: 06/01/13 SUPERSEDING REVISION: 5
STAMPS:

SERVICE CLASSIFICATION NO. 14 (Continued)

APPLICABLE TO USE OF TRANSPORTATION SERVICE FOR:

Any dual-fuel electric generator having generation capacity of at least fifty (50) Megawatts applying on or after May 18, 1999 for natural gas transportation service for their electric generation equipment for a term of (5) years is eligible. This Service Classification does not apply to electric generation customers receiving service prior to May 18, 1999 during the term of such customers' existing contracts. Natural gas transportation service for any requirement other than electric generation, such as ignition gas, space heating, etc, whether or not separately metered, does not qualify for service under this Service Classification.

To obtain service under this Service Classification, Customer must follow procedures for processing requests from electric generators for gas transportation service, which appear on Leaf Nos. 200 - 204. In addition, Customer must enter into a service agreement with the Company, the form of which appears on Leaf Nos. 205 - 210. Customer may designate a Gas Balancing Agent to manage daily nominations and balance gas deliveries on an aggregated basis to one or more of the customer's generating facilities to mitigate daily imbalances. Should Customer elect to designate a Gas Balancing Agent, a Designation of Gas Balancing Agent Agreement provided on Leaf Nos. 119.11 to 119.15 must be entered into by the Customer, its Gas Balancing Agent and the Company.

Any Customer that qualifies for service under this Service Classification may take service under Rate Schedule 1. In addition, the Company may, at its option, enter into individually negotiated service arrangements with Customer under Rate Schedule 2, provided that negotiated contracts on similar overall terms shall be available to similarly situated customers. Customers contracting for interruptible service must have complete standby fuel and equipment available at the beginning of the winter season to withstand interruptions of gas service for at least five days. This requirement applies to human needs Customers that use distillate or non-distillate oil as their alternate fuel, and to other Customers that are unwilling and/or unable to shut down during periods of gas service interruption. It will not apply if a non-human needs Customer stipulates in writing that the Customer is willing and able to shut down during periods of interruption.
