Section 4 2<sup>nd</sup> Revised Page 2.1 Superseding 1st Revised Page 2.1

## ADVANCED DATA SERVICES

## DESCRIPTION OF ADVANCED DATA SERVICES (Continued)

- 4.1 FRAME RELAY SERVICE (Continued)
  - (Effective February 15, 2013, Frame Relay Service is no longer available to new customers. (N) See Paragraph 4.1.0 preceding.) (N)
  - 4.1.2 Service Components (Continued)
    - Standard Features (Continued)

3. Port Only Connections – UNIs and NNIs are also provisioned as a Port Only Connection. UNI Port Only Connection provides a Frame Relay Network connection based on the port connection speeds of 56 Kbps, 128 Kbps, 256 Kbps, 384 Kbps 512 Kbps, 768 Kbps, 1.536 Mbps, 4 Mbps, 6 Mbps, 10 Mbps, 22 Mbps and 44.736 Mbps. NNI Port Only Connection provides a Frame Relay Network connection based on the port connection speeds of 384 Kbps, 1.536 Mbps and 44.736 Mbps. The channel speed of the access channel must be sufficient to accommodate (M) the Frame Relay port speed. Each port can accommodate multiple PVCs. UNI Port Only and NNI Port Only Connections are available on a month-to-month, one-year, three-year and five-year service period plan. Customers may access Port Only Connections via Telephone

- Company-provided digital access facilities. The associated regulations, rates and charges under the appropriate Telephone Company Tariff shall apply in addition to the regulations, rates and charges associated with FRS.
- 4. Permanent Virtual Circuit (PVC) Committed Information Rate (CIR) -Provides a mechanism to prioritize applications on a per-PVC basis over a Frame Relay UNI. This feature allows all users to maintain the capability to transfer data within their CIR on a non-sequential, highpriority basis without potential packet data discard due to network congestion.

The following types of PVC CIR are available:

Standard - A Standard PVC is a logical channel path between two customer Frame Relay ports.

Multi-jurisdictional – A Multi-jurisdictional PVC is a logical channel path between two customer Frame Relay ports, one being an interstate port and the other an intrastate port. A Multijurisdictional PVC falls under federal jurisdiction and the PVC CIR rates, rules and regulations from the Verizon Telephone Companies FCC Tariff No. 20 are applicable, where available.
