ADVANCED DATA SERVICES

DESCRIPTION OF ADVANCED DATA SERVICES (Continued)

4.1   FRAME RELAY SERVICE (Continued)
       (Effective February 15, 2013, Frame Relay Service is no longer available to new customers.   (N)
       See Paragraph 4.1.0 preceding.)   (N)

       4.1.2   Service Components (Continued)

               B.   Optional Features and Functions

                       Optional features and functions provide the Customer with additional capabilities
                       for use with the FRS packet network. Nonrecurring charges do not apply when
                       optional features are ordered in conjunction with the initial installation of the
                       associated Frame Relay Service Port or Access Connection. When ordered
                       subsequent to the initial installation of the associated Frame Relay Service Port or
                       Access Connection, nonrecurring charges apply as set forth in the Rate
                       Attachment at the end of this Section.   (M)

               1.   Additional Logical Channels * allow 56 Kbps, 384 Kbps and 1.536 Mbps
                       Customers to simultaneously operate multiple channels on a single port. The
                       maximum additional logical channels available for 56 Kbps or 384 Kbps UNI
                       Port With Access Line is 199 and the maximum additional logical channels
                       available for 1.536 Mbps UNI Port With Access Line is 991. Each additional
                       logical channel must be associated with a specific network address.

               2.

* Effective November 1, 2003, Additional Logical Channels per UNI Port with Access Line are furnished to   (T)
  existing customers only. No longer available to new customers. Additions, rearrangements, and moves
  are not permitted. Additional Logical Channels are available to new and existing Enterprise Service
  customers.
