SECTION 4 - INTRALATA TOLL PRESUBSCRIPTION

4.1 General

IntraLATA toll pre-subscription is a procedure whereby an end user may select and designate an IntraLATA Toll Provider ("ITP") to access IntraLATA toll calls without dialing an access code. The end user may designate an ITP for IntraLATA toll, a different carrier for InterLATA toll, or the same carrier for both. This ITP is referred to as the end user preferred IntraLATA toll provider.

Each carrier will have one (1) or more access codes assigned to it for various types of service. When an end user selects a carrier as its preferred IntraLATA toll provider, only one (1) access code of that carrier may be incorporated into the switching system of the Company permitting access to that carrier by the end user without dialing an access code. Should the same end user wish to use other services of the same carrier, it will be necessary for the end user to dial the necessary access code(s) to reach that carrier's other service(s).

An ITP must use Feature Group D ("FGD") Switched Access Service to qualify as an IntraLATA toll provider. All ITPs must submit a Letter of Intent ("LOI") to the Company at least twenty (20) days prior to the IntraLATA toll-presubscription-conversion date or, if later, forty-five (45) days prior to the date on which the carrier proposed to begin participating in IntraLATA toll presubscription.

Selection of an ITP by an end user is subject to the terms and conditions in Section 4.2.
