

PSC NO: 119 ELECTRICITY
NEW YORK STATE ELECTRIC & GAS CORPORATION
Initial Effective Date: 01/12/15

Leaf: 19
Revision: 1
Superseding Revision: 0

GENERAL INFORMATION

2. How Service May Be Obtained: (Cont'd.)

C. Underground Extensions for New Residential Subdivisions: (Cont'd.)

(9) Special Conditions: (Cont'd.)

- (d) Where a one-pole extension, including but not limited to road crossing pole extensions, would enable an existing overhead distribution line to be connected to a proposed distribution line in a residential subdivision, such extension may be installed overhead, rather than underground; provided, however, that if the necessary facilities are proposed to be in a VSR, the procedures set forth in Rule 2.B.(3) of this tariff will apply.
- (e) The Company may install overhead distribution lines in a residential subdivision or section thereof otherwise required to have underground distribution lines when;
 - (i) the developer of the residential subdivision is not primarily engaged in the construction of dwelling units within the residential subdivision;
 - (ii) no governmental authority having jurisdiction to do so has required underground service; and
 - (iii) either:
 - 1) five years have elapsed from the sale of the first lot within the residential subdivision to the first application for installation and the Company has no indication that there will be other new applicants in the residential subdivision within six months, or
 - 2) five years have elapsed from the time of final approval of the residential subdivision or section thereof and less than 25 percent of the lots have been sold in the residential subdivision or any section thereof except where ten percent or more of the lots in the residential subdivision or any section thereof have been sold within the last two years.

In cases where overhead installation would be permissible in accordance with conditions (iii), except that less than five years have elapsed and the Company has reason to believe that the residential subdivision will not be developed sufficiently soon to permit the orderly utilization of underground lines installed to serve the initial applicant(s), the Company may petition the Commission to allow overhead installation. Such petition shall set forth the relevant economic, engineering, or environmental factors. The petition shall be granted or denied based on those factors.
