Revision: Original

Section 10 – Local Interconnection Service (cont'd)

(N)

10.3 Description of Service

- A. LIS provides a connection between a Customer's broadband facilities and the public switched telephone network, and related Services described herein. In order to make use of the Company's LIS, Customer's broadband facilities must consist of an IP-based, broadband connecting Facility between the Customer and the Premises of each Subscriber that has the ability to use a Cable Modem Termination System (CMTS) employing the Network-based Call Signaling specified by Cable Television Laboratories, Inc. (CableLabs®), a soft switch, a media gateway, and appropriate Customer Premises Equipment. LIS does not support Customers providing services to Subscribers that operate using a different format than provided by the Company.
- B. The IP-based, broadband connecting Facility between Customer and Subscribers, the CMTS, the soft switch, the connecting Facilities to the Company's media gateway, and all Customer Premises Equipment must be provided by the Customer or its Subscribers and is not included as part of LIS. The Company will only accept and deliver traffic in time division multiplex ("TDM") protocol. The Customer shall, at its sole cost, be responsible for providing all equipment, software, facilities and IP connectivity necessary for the Customer to provide interconnected VoIP service to its Subscribers.
- C. LIS is available to Customers where suitable Facilities exist, are technologically available, and are operationally and economically feasible.
- D. LIS provides standard 10-digit telephone numbers with associated two-way local exchange telecommunications service to permit Customers to provide local interconnected VoIP service to Customer's Subscribers. Where available in a service territory, LIS may also include support for the provision of 911 capability, Telecommunications Relay Services (711), and Directory Listings. Toll services, Operator Services and Directory Assistance are not included in LIS. LIS does not support calling to 976 or similar exchanges or to calls to the 900 Service access code.

10.4 Use of Service

- A. LIS is provided subject to, and in accordance with, the regulations and rates in this Tariff, applicable law, and the Company's agreements with other providers, including but not limited to: applicable state or federal law, applicable state or federal regulations, orders issued by regulatory agencies and/or courts of competent jurisdiction, Incumbent Local Exchange Company ("ILEC") interconnection agreements, or similar requirements (collectively "Company Obligations"). To the extent that changes in Company Obligations affect the terms and conditions under which the Company may provide LIS, including being unable to provide LIS at all, the liability of the Company for any such changes shall be subject to the limitation of liability provisions set forth in Section 3 and this LIS Tariff.
 - 1. Customer shall, at its sole cost, be responsible for providing all equipment, software, Facilities and IP connectivity (including connectivity to Subscribers) necessary for the Customer to provide interconnected VoIP service to its Subscribers.
