GENERAL TARIFF

EXPLANATION OF TERMS

Same Building

Any single building, except that when a building has only one story above ground and is divided into units, such as stores, without access between the units, each unit is considered a building.

Abutting buildings, or sections of a structure divided above the basement by building walls, are classed as the same building only when openings, such as doorways, through the walls above the basement are in general use and afford ready access at all times between the abutting buildings or the sections. When the openings through the dividing walls are accessible to one subscriber only, the abutting buildings or sections are classed as the same building for that subscriber only.

Each enclosed pier is classed as a separate building.

Same Premises

All space in the same building in which one subscriber has the right of occupancy to the exclusion of others or shares the right of occupancy with others; and all space in different buildings on continuous property, provided such buildings are occupied solely by one subscriber. Foyers, hallways and other space provided for the common use of all occupants of a building are considered the premises of the operator of the building.

School

An establishment for elementary grade or secondary academic instruction where lodging for the students is maintained on the premises.

Service Point

The term "Service Point" when used in connection with subscriber-provided communication channels denotes the point on the subscriber's premises where channels provided by or furnished to the subscriber are terminated in switching equipment used, at least in part, for communications with stations or subscriber-provided terminal equipment.

Serving Central Office

The central office from which local service is furnished.

Serving Terminal

Point from which line or channel is extended, by means of local wiring and facilities, to a subscriber's premises.
