

TC Systems, Inc.
P.S.C. No. 6 -- Telephone
Access Services
Effective Date: June 26, 2015

Section 9
Leaf No. 8
Revision: 0

9. AT&T DEDICATED ETHERNET SERVICE

9.3 Standard Rate Elements (continued)

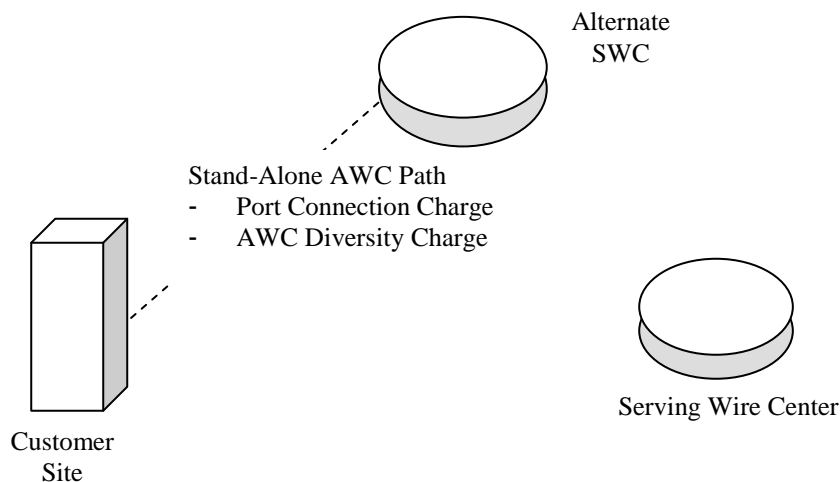

9.3.2 Diversity Options (continued)

B. Alternate Wire Center Diversity (continued)

2. Stand-Alone Alternate Wire Center (AWC) Routing

Alternate Wire Center Diversity is available as a stand-alone AWC arrangement where there is no actual diversity. In this arrangement, an AT&T Dedicated Ethernet Service Port Connection is routed to an alternate wire center rather than its normal serving wire center.

The Customer is assessed a Port Connection Charge and an Alternate Wire Center Diversity charge for a stand-alone AWC route connecting the Customer Site to the alternate serving wire center.

The Port Connection is routed to a serving wire center other than its normal serving wire center in a Stand-Alone AWC arrangement.
