

PSC NO: 10 – Electricity  
Consolidated Edison Company of New York, Inc.  
Initial Effective Date: 07/27/2015

Leaf: 383  
Revision: 3  
Superseding Revision: 2

## GENERAL RULES

### Application Forms – Continued

### Form G – Application for Net Metering or Standby Service and/or Buy-Back Service- Continued

#### Section 4. If you request Net Metering (Rider R) for your generation

Please check off the box(es) applicable to the generation for which you are requesting Net Metering service.

*For a Residential Customer (SC 1):*

- ☐ wind electric generating equipment with a rated capacity less than or equal to 25 kW
- ☐ solar electric generating equipment with a rated capacity less than or equal to 25 kW
- ☐ micro-CHP generating equipment with a rated capacity equal to or greater than 1 kW but less than or equal to 10 kW
- ☐ fuel cell electric generating equipment with a rated capacity less than or equal to 10 kW
- ☐ micro-hydroelectric generating equipment with a rated capacity less than or equal to 25 kW

NOTE: Customers with micro-CHP equipment must attach documentation that demonstrates the generation equipment: (a) is expected to produce at least 2,000 kWh annually and (b) has a design total fuel use efficiency of not less than 80%.

*For a Non-Residential Customer: (SCs other than SC 1):*

- ☐ solar electric generating equipment with a rated capacity less than or equal to 2,000 kW
- ☐ wind electric generating equipment with a rated capacity less than or equal to 2,000 kW
- ☐ micro-hydroelectric generating equipment with a rated capacity less than or equal to 2,000 kW
- ☐ fuel cell electric generating equipment with a rated capacity less than or equal to 2,000 kW
- ☐ farm waste electric generating equipment with a rated capacity less than or equal to 1,000 kW used at a Non-farm Location

*For a Customer with electric generating equipment located and used at its Farm Operation:*

- ☐ farm waste electric generating equipment with a rated capacity less than or equal to 1,000 kW
- ☐ wind electric generating equipment with a rated capacity less than or equal to 500 kW if the Farm Operation is also the location of the Customer's primary residence
- ☐ solar electric generating equipment with a rated capacity less than or equal to 100 kW if the Farm Operation is billed under a residential Service Classification.

NOTE: Net metering wind, solar, or micro-hydroelectric generating equipment cannot be served on the same account as farm waste electric generating equipment at a Non-farm Location, micro-CHP, or fuel cell electric generating equipment.
