

PSC No. 2 – Water  
UNITED WATER WESTCHESTER INC.  
Initial Effective Date: December 5, 2014

Leaf No. 99  
Revision: 0  
Superseding Revision:

### **GENERAL INFORMATION**

#### **SERVICE CLASSIFICATION NO. 1** (Continued)

Applicable to both RATE DISTRICT 1 and 2

#### **SPECIAL PROVISIONS:**

1. Service to an underground lawn sprinkler system will be furnished under Service Classification No. 1, subject in all respects to the definitions, restrictions and limitations hereinafter contained, all water furnished therefore to pass through and be registered by the water meter on the premises.
  - (a) Connection of the underground lawn sprinkler system may not be made directly to the water piping within the building. The Customer shall install a testable double check valve between the water piping at the Customer premise and the underground lawn sprinkler system of make approved by the Company. The valve shall be connected only in the manner shown in Leaf No. 92 hereof.
  - (b) The term "section" as used herein shall mean the total number of spray heads connected at one time to one underground lawn sprinkler system which number of spray heads will receive water simultaneously from said connection.
  - (c) Every Applicant for underground lawn sprinkler system service shall file an application with the Company for permission to install and operate a system. The application shall have attached thereto a sketch of the proposed installation showing thereon the area to be sprinkled; the size of the pipe serving the system; the number of spray heads in each and every section; the number of sections to be connected to the system; the volume of water required in gallons per minute for each separate section and the water volume in gallons per minute required by the greater number of heads to be operated simultaneously. The application and sketch shall be accompanied by a \$14.22 inspection fee.
  - (d) The Company assumes no responsibility for the adequacy of service pipe to the premises to supply the underground lawn sprinkler system; the Company assumes no responsibility for the failure or decrease in water pressure and available volume within the premises supplied when such condition is caused by the water demand of the underground lawn sprinkler system; and the Company assumes no obligation to increase, or permit the increase of, the service pipe to the premises to meet the increase in water requirements caused by the operation of the underground lawn sprinkler system.
