Albany, New York 12223-1350

Re: Statement of Market Supply Charge - Capacity

Dear Secretary Phillips:

Consolidated Edison Company of New York, Inc. ("Con Edison" or the "Company") is filing a revision to the Statement of Market Supply Charge - Capacity ("MSC CAP") to P.S.C. No. 10 – Electricity as follows:

MSC CAP – Statement No. 73 to P.S.C. No. 10 – Electricity

This Statement is to become effective on May 1, 2021.

The MSC CAP Statement is issued pursuant to General Rule 25.1 of P.S.C. No. 10 – Electricity. It contains per-kWh charges applicable to energy-only rate classes and per-kW charges applicable to demand-billed classes. For customers billed under Rider M, the kW charges are applicable to the customer's installed capacity ("ICAP") tag. Other demand-billed customers pay for capacity based on their registered demand.

On May 8, 2020, Con Edison filed rates effective May 13, 2020 through its MSC CAP – Statement No. 61 ("Statement No. 61"). The rates included in Statement No. 61 reflected the deferral of a portion of summer capacity costs for New York City residential customers. The deferral was implemented in light of large increases in capacity costs due to wholesale market forces and changes in capacity cost allocation, during the extraordinary circumstances of the COVID-19 pandemic and its economic impacts. Today's filing includes recovery, from New York City residential customers, of the remainder of the deferred balance, including interest, of approximately \$44.2 million.

Pursuant to the Order Approving Tariff Amendments, issued and effective September 23, 2019, in Case 19-E-0457, SC 1 Rider AB Rate I rates were added to this statement.

Respectfully submitted,

CONSOLIDATED EDISON COMPANY OF NEW YORK, INC.
