Leaf No. 160.39.17.4, Revision 0

Purpose of Filing

The Companies are submitting tariff revisions in compliance with Ordering Clause No. 8 of the Order to implement net crediting for Community Distributed Generation (“CDG”) projects that are compensated under the Value Stack provisions in the Companies’ tariffs.

Overview

In accordance with the Order and effective April 1, 2021, the Companies are filing revisions to its tariffs to implement the Net Crediting Program for new CDG projects where compensation

for excess generation is calculated pursuant to Value Stack provisions in the Companies' tariffs¹. The Net Crediting Program is an alternative payment and crediting methodology for CDG Hosts and CDG Satellites that allows CDG Satellites to receive one bill from the Company that reflects a Net Member credit in lieu of receiving an additional separate bill from the CDG Host. The Company will remit payment to the CDG Host, less a Utility Administration fee.

Existing CDG projects that are compensated pursuant to Value Stack provisions can enroll their project on a first-come, first-serve basis. Additionally, the CDG Host must be current in payments for electric charges on their Host account to participate in the Net Crediting Program. The CDG Host will submit an enrollment to participate in the Net Crediting Program. As part of the enrollment process, the CDG Host will provide the CDG Savings Rate for a project that will apply to all CDG Satellites, except for the excluded anchor customer (if an anchor customer is designated by the CDG Host).

The Companies have updated their CDG Value of Distributed Energy Resources Procedural Requirements to include the processes for participating in the Net Crediting Program.

Newspaper Publication

In accordance with Ordering Clause No. 12 of the Order, the requirements of Public Service Law 66(12)(b) and 16 NYCRR 720-8.1 related to newspaper publication of the tariff amendments are waived.
