Purpose of the Filing

After review and discussions with New York Department of Public Service Staff, the Companies are filing additional tariff amendments to its June 26, 2015 compliance filing. The Companies are clarifying that the excess monetary credit shall reflect offsetting the per kWh charges only. The Companies have also proposed revisions to the criteria listed in the tariff to determine if net metered projects are considered qualified for grandfathering to retain monetary crediting and the project in-service dates. The Companies list the criteria as set forth in the April Order, and have removed language that would terminate the grandfathering upon account closure.

Furthermore, the Companies are consolidating changes that were approved by the Commission to establish net metering for non-residential, non-farm based farm-waste customers that became effective on June 27, 2015 with the changes that were approved in the April Order.

Newspaper Publication

In accordance with Ordering Clause 2 of the Order, the requirements of 66(12)(b) of the Public Service Law requiring newspaper publication has been waived.
