Dear Secretary Phillips,

The System Benefits Charge ("SBC") statement includes the Clean Energy Fund ("CEF") surcharge, the CES Tier 2 Maintenance and Backstop Charges, which were previously filed and became effective on October 1, 2023, and the Integrated Energy Data Resource ("IEDR") surcharge.

The CEF and IEDR surcharges are updated annually on January 1. The CEF Surcharge is updated with the costs stated in the CEF Order and the CEF Modification Order, and includes a reconciliation of any prior period over or under collection. The IEDR surcharge recovers the costs associated with the implementation of the IEDR by NYSERDA. It is based on the projected IEDR program costs divided by projected sales and includes carrying charges using the Other Customer Provided Capital Rate, plus or minus any under- or over-collection for prior years. To determine the total collection amount, the Companies used the most recent Bill-As-You-Go invoice from NYSERDA. Collections for 2023 (January through November actuals plus an estimate for December) were subtracted from the invoice amount to determine the remaining balance. The remaining balance is divided by projected sales to calculate the 2024 rate. A reconciliation of any over/under collections will be performed at the end of calendar year 2024.

Newspaper Publication

In accordance with Ordering Clause 49 of the CEF Order, and Ordering Clause 11 of the IEDR Order, the requirements of 66(12)(b) of the Public Service Law requiring newspaper publication has been waived.
