Re: Net Energy Metering for Wind Electric Generation

Dear Commissioners:

The amended tariff leaves set forth below are filed by Central Hudson Gas & Electric Corporation ("Central Hudson" or the "Company") on June 13, 2005 to become effective September 30, 2005.

P.S.C. No. 15 - Electricity

Original Leaf No. 167.3
Original Leaf No. 167.4
Original Leaf No. 213.3
Original Leaf No. 213.4
Original Leaf No. 213.5
1st Revised Leaf No. 272.13.1
Addendum SIR No. 6 - Standardized Interconnection
Requirements

These tariff revisions have been made in accordance with Public Service Law Section 66-1 ("PSL 66-1"), regarding wind generating systems and net energy metering.

Customers electing service under the wind generating special provisions filed herein are required to comply with the standards and requirements set forth in the Company's tariff, PSC No. 15 - Electricity and Addendum-SIR to PSC No. 15. A revised Standardized Interconnection Requirements ("SIR") Addendum is also filed with the tariffs listed above. Central Hudson participated in conferences with other New York State utilities to develop the revised SIR in order to comply with PSL 66-1. While the tariff revisions filed herein do not address hybrid systems (being defined as more than one type of generating system. Examples are wind, photovoltaic, and farm waste), the Company recommends, as discussed with PSC Staff, that technical conferences be convened over the summer of 2005 in order to address and resolve hybrid system issues.

Because these Special Provisions would require an interconnection agreement with the Company, and any customers expressing interest in taking service thereunder would be in direct contact with a Company representative, Central Hudson is requesting that the requirements of §66(12)(b) of the Public Service Law as to newspaper publication be waived.

Questions related to this filing should be directed to Glynis L. Bunt at
(845) 486-5420.

Yours very truly,

Arthur R. Upright
