Re: Tariff Changes: S.C. No. 14 Net Metering

Dear Commissioners:

Central Hudson Gas & Electric Corporation ("Central Hudson" or the "Company") hereby files proposed tariff amendments to clarify the net metering requirements of Special Provision 14.7 contained in Service Classification No. 14, as more fully discussed below. These amendments are issued on February 28, 2005 to become effective on June 1, 2005.

P.S.C. No. 15 - Electricity

1st Revised Leaf No. 272.13
Original Leaf No. 272.13.1

With this filing, Central Hudson proposes to clarify the definition of eligible rated capacity under Special Provision 14.7 as the lesser of the AC or DC nameplate rating of the photovoltaic or wind generation. In addition, the Company proposes to clarify that demand metered customers whose demand falls below, or is expected to fall below, 10 kW with the installation and/or operation of on site wind or photovoltaic generation meeting the applicable capacity eligibility requirements may choose to take service under Special Provision 14.7.

Because the proposed revisions to S.C. No. 14 are for clarification purposes only, provision of service under this service classification would require an interconnection agreement with the Company, and any customers expressing interest in taking service thereunder would be in direct contact with a Company representative, Central Hudson is requesting that the requirements of §66(12)(b) of the Public Service Law as to newspaper publication be waived.

Questions related to this filing should be directed to Glynis L. Bunt at 845-486-5420.

Yours very truly,
Arthur R. Upright
