Re: Proposed Tariff Filing in Compliance with the Commission's Order Adopting Net Metering Tariff Provisions and Requiring Additional Filings, Case Nos. 04-E-0917 and 04-E-0546

Dear Secretary Brillling:

New York State Electric & Gas Corporation ("NYSEG" or the "Company") hereby submits for filing the following enclosed tariff leaves in compliance with the New York Public Service Commission's (the "PSC" or the "Commission") Order Adopting Net Metering Tariff Provisions and Requiring Additional Filings, issued and effective December 15, 2004 in Case Nos. 04-E-0917 and 04-E-0546 (the "Order"). This filing is also made in compliance with Appendix 7-H (electronic tariff filing system) to the Commission's Codes, Rules and Regulations (16 NYCRR Appendix 7-H).

PSC No. 120 – Electricity, Schedule for Electric Service

Leaf No. 117, Revision 1
Leaf No. 264, Revision 3
Leaf No. 266, Revision 1
Leaf No. 274, Revision 2
Leaf No. 274.1, Original
Leaf No. 303, Revision 1
Leaf No. 303.1, Original
Leaf No. 304, Revision 3

Effective May 29, 2005.

The above-listed leaves are being filed in compliance with Ordering Clause No. 4 of the Order. Today's filing provides additional metering options for the net metering of Time-of-Use (TOU) PV residential customers and TOU farm waste customers.

More specifically, a TOU PV residential customer may request the Company to install, at the customer's expense, a second TOU meter to measure the excess electricity generated as a result of the customer's generator. This metering option is currently available to TOU farm waste customers. In addition to the dual TOU metering configuration, TOU PV customers and non-demand TOU farm waste customers may select a single TOU

meter with bi-directional capabilities. Demand billed farm waste customers remain ineligible for single metering.

NYSEG has further proposed revisions to its Service Classification No. 12 to permit a customer that has chosen the single meter option to agree to allow NYSEG to separately meter, at NYSEG's expense, excess electricity generated by the customer's generator.

The Company will continue to track the incremental costs of implementing the additional metering options and will defer these costs as Category 2 Uncontrollable Costs, for future recovery, in accordance with NYSEG's Electric Rate Plan.

Publication

The Company requests that the requirement of § 66(12)(b) of the Public Service Law and 16 NYCRR §720-8.1 as to newspaper publication be waived because existing TOU PV residential customers and non-demand TOU farm-waste customers affected by these tariff changes will be notified directly. New customers will be advised of these tariff changes when they enter into interconnection agreements with the Company.

Company Contact

Please direct any questions pertaining to this filing to Lori Cole at (607) 762-8710 or to Carl King at (607) 347-2959.

Very truly yours,
