Re: Capacity Release Service

Dear Secretary Brillig:

On July 20, 2009, Consolidated Edison Company of New York, Inc. ("Con Edison" or the "Company") filed two tariff leaves containing proposed revisions to its Schedule for Gas Service, P.S.C. No. 9 – GAS (the "Gas Tariff"). As explained in that filing, the proposed revisions seek to modify the Company's capacity release service available to Capacity Release Sellers serving firm transportation customers as a result of revisions to the federal regulations governing the release of capacity on interstate pipelines. While the tariff revisions are correct in terms of the modifications proposed, the Company wishes to correct two inadvertent errors in one of the tariff leaves filed on July 20, 2009. Tariff Leaf 303 has been revised to: (i) change the word "capital" to "capacity" on Line 9 of Section (J)(5) and (ii) correct a word/No. transposition on Line 14 in the same Section. (See attached Leaf 303, Revision 11 Superseding Revision 10, which is being filed electronically today and is scheduled to become effective on November 1, 2009.)

The Company also wishes to clarify a statement made in its July 20<sup>th</sup> transmittal letter (page 2) indicating that the capacity release rate will be set at the Company's projected WACOC based on rates for each interstate pipeline as published in its FERC tariff. The projected WACOC includes all rates that the Company pays for firm pipeline capacity as published in the pipeline's FERC tariff and/or as negotiated with the pipeline.

The legal notice to be published by the Company will reference the above-described corrections to Tariff Leaf 303. Questions regarding this filing may be directed to me at (212) 460-3325.

Very truly yours,

Christine Colletti  
Director – Rate Engineering
