Dear Commissioners:

The amended tariff leaves set forth below are filed by Central Hudson Gas & Electric Corporation ("Central Hudson" or the "Company") on April 1, 2009 to become effective July 1, 2009 in order to reflect amendments made to Section 66-l of the Public Service Law, which became effective on January 1, 2009.

These amendments include changes to the maximum size, installation costs of wind generation systems eligible for net metering, and crediting procedures for excess generation. In addition, these amendments reflect expansion of net metering to non-residential wind generation. Finally, the wind generation load threshold on Central Hudson's system has been expanded to 3.6 MW, or 0.3% of the Company's electric demand of 1201 MW for 2005.

Since customers participating in net metering are subject to interconnection requirements and are therefore in direct contact with Central Hudson, the Company requests that the requirements of 66(12)(b) of the Public Service Law as to newspaper publication for the amendments listed herein be waived.

Questions related to this filing should be directed to Lauren M. Guido at (845) 486-5761.

Yours very truly,

Michael L. Mosher
