Re: Filing to Add LED Street Lighting Fixture Option

Dear Commissioners:

The tariff leaf and statement set forth below are filed by Central Hudson Gas & Electric Corporation ("Central Hudson" or "the Company") on August 25, 2010 to become effective December 1, 2010.

P.S.C. No. 15 – Electricity

10th Revised Leaf No. 221

Statement of Light Emitting Diode (LED) Fixture Delivery Rates - LED-1

The purpose of this filing is to include an LED option under rate C (customer owned and maintained; delivery only) of Service Classification No. 8 – Public Street and Highway Lighting. Several municipalities have indicated plans to install LED lights made possible through the receipt of ARRA stimulus funding. In order to accommodate these installations on a timely basis the Company proposes, via this filing, to identify LED fixture options on a statement to be filed apart from the Company's rate schedule. The annual kWh and annual charge for each such fixture would be calculated pursuant to the current Commission-approved tariff provisions. Installation and/or attachment considerations would be addressed on a case-by-case basis through the use of an Attachment Agreement, also pursuant to current Commission-approved tariff provisions.

Since the Company will be in direct contact with municipalities to coordinate installation, the Company requests that the requirements of §66((12)(b)) of the Public Service Law as to newspaper publication be waived.

Work papers supporting Statement No. LED-1 have been provided to Staff. Questions related to this filing should be directed to Amy S. Dittmar at (845) 486-5433 or [adittmar@cenhud.com](mailto:adittmar@cenhud.com).

Yours very truly,

Michael L. Mosher  
Vice President - Regulatory Affairs
