CPCN Application - Matter Number - 11-01012

Dear Jaclyn A. Brilling

Attached please find a revised Application for CPCN for Southern Tier Network Inc. (STN). We have filed the tariff and TCCI forms electronically.

It is the intent of the Southern Tier Network Inc. to develop and provide for hire wholesale dark fiber access. STN will seek to establish a fiber foundation within the Southern Tier region. This foundation will be attractive to entities that require transmission capacity where they have geographic gaps in their facilities, need additional capacity or require alternative or redundant routing, and others requiring transmission capacity to carry their telecommunications traffic.

The revision to the application clarifies that STN will provide Ethernet services based upon customer demand on an individual case basis. In addition, the revision also clarifies that STN does not intend to offer local exchange, 0- or IntraLATA services at this time.

Thank you for your support. Please feel free to contact me at (585) 643-2228 or via e-mail at andy@ecctec.com if you have any questions upon review of this application.

Sincerely,

Andrew Lukasiewicz
