## SECTION 5: LOCAL EXCHANGE SERVICE

### 5.11 Private Line Service

#### 5.11.1 Description

Private line service provides a dedicated transmission path on a point-to-point basis that does not interface with a Company switch. Private line is an IntraLATA service and is offered on a DS3, OC3, OC12 and OC48 level. Private line service can be utilized either by collocated customers or by customers in a location that is served by the Company's fiber network (On-Net).

#### 5.11.2 Restrictions

The following restrictions apply to private line service:

1. If only one or none of the end-points is On-Net, the private line service is then limited to a DS3 level.
2. Private line service for service levels above OC3 is available on an individual case basis.
