TARIFF FORMAT

A. Leaf Numbering: Leaf numbers appear in the upper right corner of the page. Leaves are numbered sequentially. However, new leaves are occasionally added to the tariff. When a new leaf is added between leaves already in effect, a decimal is added. For example, a new leaf added between leaves 11 and 12 would be leaf 11.1.

B. Leaf Revision Numbers: Revision numbers also appear in the upper right corner of each leaf where applicable. These numbers are used to indicate the most current leaf version on file with the Commission. For example, 4th Revised Leaf 13 cancels 3rd Revised Leaf 13. Consult the Check Sheet for the leaves currently in effect.

C. Paragraph Numbering Sequence: There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:

D. Check Sheets: When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the leaves contained in the tariff, with a cross reference to the current Revision Number. When new leaves are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this leaf if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some leaves). The tariff user should refer to the latest Check Sheet to find out if a particular leaf is the most current on Commission file.
