SECTION 3 - DESCRIPTION OF SERVICE AND RATES

3.1 Timing of Calls

The customer's monthly usage charges for Carrier service are based upon the total number of minutes the customer uses and service options subscribed to. Chargeable time begins when the connection is established between the calling station and the called station or PBX. Chargeable time ends when the either party "hangs up." However, if the called station "hangs up" but the calling station does not, chargeable time will end when the connection is released by automatic timing equipment within the telecommunications network.

There are no charges incurred if a call is not completed.

3.2 Start of Billing

For billing purposes, the start of service is the first day on which service is provided to the customer. The end of service date is the last day or any portion thereof that service is provided to the customer.

3.3 Interconnection

Service furnished by Carrier may be interconnected with services or facilities of other authorized communications common carriers and with private systems, subject to the technical limitations established by Carrier. Service furnished by Carrier is not part of a joint undertaking with such other carriers. Any special interface equipment of Carrier and other participating carriers shall be provided at the customer's expense.

Interconnection with the facilities or services of other carriers shall be under the applicable terms and conditions of the other carriers' tariff. The customer is responsible for taking all necessary legal steps for interconnecting his customer-provided terminal equipment or communications systems with Carrier's. The customer shall secure all licenses, permits, right-of-ways, and other arrangements necessary for such interconnection.

Carrier's service may be used with or terminated in customer provided terminal equipment or customer provided communication systems, such as teleprinters, handsets, or data sets. Such terminal equipment shall be furnished and maintained at the expense of the customer. The customer is responsible for all costs at his premises, including customer personnel, wiring, electrical power, and the like incurred in his use of Carrier's service.

If the customer fails to maintain and operate his terminal equipment properly, resulting in the occurrence or possibility of harm to Carrier's equipment or personnel, or impairment to the quality of service to other customers, Carrier may, upon written notice, require the use of protective equipment at the customer's expense. If this fails to produce satisfactory quality and safety of service, Carrier may terminate the customer's service.

3.5 Calculation of Distance

Usage charges for all mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call.

The airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involved. The company uses the rate centers and associated vertical and horizontal coordinates that are generally accepted within the telecommunications industry.

FORMULA:

The Square Root of:
$$\frac{(V1 - V2)^2 + (H1 - H2)^2}{10}$$

3.7 Special Services

For purposes of this tariff, a Special Service is deemed to be service requested by the customer for which there is no prescribed rate in this tariff. Special Services charges will be developed on an individual case basis and filed in this tariff. Special Services charges will be based on the estimated cost of furnishing such services including the cost of operating and maintaining such a service, the cost of equipment and materials used in providing such a service, the cost of installation including engineering, labor supervision, transportation, and the cost of any other specific item associated with the particular Special Services request.

3.7.1 New York Relay Service

The Company will provide access to a telephone relay center for New York Relay Service. The service permits telephone communications between hearing and/or speech impaired individuals who must use a Telecommunications Device for the Deaf (TDD) or a Teletypewriter (TTY) and individuals with normal hearing and speech. The Relay Service can be reached by dialing an 800 number. Specific 800 numbers have been designated for both impaired and non-impaired customer to use.

3.7.1.2 Regulations

- A. Only intrastate calls can be completed using the New York Relay Service under the terms and conditions of this tariff.

4.5 Schools and Libraries Discount Program**4.5.1. General**

The Schools and Libraries Discount Program permits eligible schools (public and private, grades Kindergarten through 12) and libraries to purchase the Company services offered in this tariff and the (additional company tariff references, if appropriate) at a discounted rate, in accordance with the Rules adopted by the Federal Communications Commission (FCC) in its Universal Service Order 97-157, issued May 8, 1997 and the New York State Public Service Commission in its Opinion and Order 97-11 Adopting Discounts for Services for Schools and Libraries, issued June 25, 1997. The Rules are codified at 47 Code of Federal Regulation (C.F.R.) 54.500 et. seq. As indicated in the Rules, the discounts will be between 20 and 90 percent of the pre-discount price, which is the price of services to schools and libraries prior to application of a discount. The level of discount will be based on an eligible school or library's level of economic disadvantage and by its location in either an urban or rural area. A school's level of economic disadvantage will be determined by the percentage of its students eligible for participation in the national school lunch program, and a library's level of economic disadvantage will be calculated on the basis of school lunch eligibility in the public school district in which the library is located. A non-public school may use either eligibility for the national school lunch program or other federally approved alternative measures to determine its level of economic disadvantage. To be eligible for the discount, schools and libraries will be required to comply with the terms and conditions set forth in the Rules. Discounts are available only to the extent that they are funded by the federal universal service fund. Schools and libraries may aggregate demand with other eligible entities to create a consortium.
