### TARIFF FORMAT

- A. **Sheet Numbering** - Sheet numbers appear in the upper right corner of the sheet. Sheets are numbered sequentially. However, occasionally, when a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. **Sheet Revision Numbers** - Revision numbers also appear in the upper right corner of each sheet. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd Revised Sheet 14. Because of various suspension periods, deferrals, etc. the Commission follows in their Tariff approval process, the most current sheet number on file with the Commission is not always the sheet in effect. Consult the Check Sheet for the sheet currently in effect.
- C. **Paragraph Numbering Sequence** - There are four levels of paragraph coding. Each level of code is subservient to its next higher level:
- 2.
  - 2.1.
  - 2.1.1.
  - 2.1.1.1.
- D. **Check Sheets** - When a Tariff filing is made with the Commission, an updated Check Sheet accompanies the Tariff filing. The Check Sheet lists the sheets contained in the Tariff with a cross reference to the current revision number. When new sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some sheets). The Tariff user should refer to the latest Check Sheet to find if a particular sheet is the most current on file with the Commission.

### **2.6. RESTORATION OF SERVICE**

**2.6.1.** The use and restoration of Service in emergencies shall be in accordance with Part 64, Subpart D of the Federal Communications Commission's Rules and Regulations, which specifies the priority system for such activities.

**2.6.2.** When a Customer's Service has been disconnected in accordance with this Tariff and the Service has been terminated through the completion of a Company service order, Service will be restored only upon the basis of application for new Service by Company's underlying facilities-based carrier.

**2.6.3.** Emergency/Crisis/Disaster/Restoration and Provisioning - Telecommunications Service Priority

**A. General**

1. The Telecommunications Service Priority (TSP) Program is a federal program used to identify and prioritize telecommunications services that support national security or emergency preparedness (NS/EP) missions.

NS/EP services are defined as those telecommunications services which are used to maintain a state of readiness or respond to and manage any event or crisis which causes or could cause injury or harm to the population, damage or loss to property, or degrades or threatens the NS/EP posture of the United States.

TSP restoration and/or provisioning shall be provided in accordance with Part 64, Appendix A of the Federal Communications Commission's Rules and Regulations (47 C.F.R.), and the "Service Vendor Handbook For The Telecommunications Service Priority (TSP) Program" and the "Service User Manual for the Telecommunications Service Priority (TSP) System" (NCS Manual 3-1-1) (Service User Manual) issued and updated as necessary by the Office of Priority Telecommunications (OPT) of the National Communications System. Any changes to or reissuance of these regulations or manuals supersede tariff language contained herein.

### **2.6. RESTORATION OF SERVICE, Continued**

#### **2.6.3. Emergency/Crisis/Disaster/Restoration and Provisioning - Telecommunications Service Priority, Continued**

##### **B. TSP Program Components**

The TSP program has two components, restoration and provisioning.

1. A restoration priority is applied to new or existing telecommunications services to ensure restoration before any other services during a service outage. TSP restoration priorities must be requested and assigned before a service outage occurs.
2. A provisioning priority is obtained to facilitate priority installation of new telecommunications services during a service outage. Provisioning on a priority basis becomes necessary when an end-user has an urgent requirement for a new NS/EP service that must be installed immediately or by a specific due date that can be met only by a shorter than standard or expedited Company provisioning time frame. As a matter of general practice, existing TSP services will be restored before provisioning new TSP services.

##### **C. TSP Request Process – Restoration**

To request a TSP restoration priority assignment, a prospective TSP user must:

1. determine that the user's telecommunications service supports an NS/EP function under one of the following four TSP categories.
  - a. National Security Leadership
    1. National Security Posture and U.S. Population Attack Warning
    2. Public Health, Safety, and Maintenance of Law and Order;
    3. Public Welfare and Maintenance of National Economic Posture.

2. identify the priority level to be requested for the telecommunications service. The priority level is determined by the end-user's TSP category and service profile. The service profile defines the user's level of support to the portion of the telecommunications service that the user owns and operates, such as Customer Premises Equipment or wiring. The five levels of priority and seven element groups that define the service profile are contained in the Service User Manual.
3. Complete the TSP Request for Service Users form (SF 315) available on the National Communications System (NCS) website (<http://tsp.ncs.gov/>).
4. For non-federal users, have their TSP requests approved by a federal agency sponsor. Non-federal users should contact the OPT, at the NCS website (<http://tsp.ncs.gov/>), for information on identifying a sponsor for TSP requests.
5. Submit the SF 315 to the OPT.
6. Upon receipt of the TSP Authorization Code from the OPT, notify the Company, and include the TSP Authorization Code in any service order to the Company requesting restoration of NS/EP services.

##### **D. TSP Request Process – Provisioning**

1. To request a TSP provisioning priority assignment, a prospective TSP user must follow the same steps listed in 2.6.A.2(A)(1) above for restoration priority assignment except for the following differences. The user should:
  - a. certify that its telecommunications service is an Emergency service. Emergency services are those that support one of the NS/EP functions listed in 2.6.A.2(A)(1) above and are so critical that they must be provisioned at the earliest possible time, without regard to cost to the user.
  - b. verify that the Company cannot meet the service due date without a TSP assignment.
  - c. obtain approval from the end-user's invocation official to request a provisioning priority. Invocation officials are designated individuals with the authority to request TSP provisioning for a telecommunications service, and include the head or director of a federal agency, commander of a unified/specified military command, chief of a military service, commander of a major military command, or state governor.

##### **E. Responsibilities of the End-User**

End-users or entities acting on their behalf must perform the following:
