TARIFF FORMAT

- A. Page Numbering** - Sheet numbers appear in the upper right corner of the Sheet. Sheets are numbered sequentially. However, occasionally, when a new Sheet is added between Sheets already in effect, a decimal is added. For example, a new Sheet added between Sheets 14 and 15 would be 14.1.
- B. Numbers** - Revision numbers also appear in the upper right corner of each Sheet. These numbers are used to determine the most current Sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd Revised Sheet 14. Because of various suspension periods, deferrals, etc. the Commission follows in its Tariff approval process, the most current Sheet number on file with the Commission is not always the Sheet in effect. Consult the Check Sheet for the Sheet currently in effect.
- C. Paragraph Numbering Sequence** – There are five levels of paragraph coding. Each level of code is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
- D. Check Sheets** - When a Tariff filing is made with the Commission, an updated Check Sheet accompanies the Tariff filing. The Check Sheet lists the Sheets contained in the Tariff with a cross-reference to the current revision number. When new Sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this Sheet if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some Sheets). The Tariff Authorized User should refer to the latest Check Sheet to find if a particular Sheet is the most current on file with the Commission.

The establishment or re-establishment of credit by an Applicant or Customer will not relieve the Applicant or Customer from compliance with other responsibilities, including the payment of advance payments or bills, and in no way modifies the provisions concerning disconnection and termination of Service for failure to pay Customer-incurred charges for Service rendered by Company.
4. Company may refuse to furnish Service to an Applicant that has not paid charges for Service of the same classification previously furnished by Company until, at the option of Company, the Applicant pays any past due bill and/or makes deposit arrangements suitable to Company.
5. If the verification of credit results in unsatisfactory credit information, the Applicant will be informed of the reason or reasons for denial of credit, after which Company may refuse to provide or continue Service pursuant to applicable Commission regulations or State law.

2.6.1. General

- A. Company may temporarily interrupt Service when necessary to affect repairs or maintenance; to eliminate an imminent threat to life, health, safety or substantial property damage; or for reasons of local, State or National emergency. Company shall establish procedures to be followed by its employees to prevent or mitigate interruption or impairment and provide prompt oral or written notification to affected Customers.
- B. It is the obligation of the Customer to notify Company of any interruptions in Service. Before giving such notice, the Customer will ascertain that the trouble is not being caused by any action or omission of the Customer, is not within the Customer's control, and is not in wiring or equipment connected to the terminal of Company.
- C. A credit allowance will not be given unless otherwise specified in this Tariff. A Service is interrupted when it becomes inoperative to the Customer, e.g., the Customer is unable to transmit or receive calls because of a failure of a component furnished by Company under this Tariff.
- D. If the Customer reports to Company that a Service, facility or Circuit is inoperative but declines to release it for testing and repair, or refuses access to Customer Premises for test and repair by Company or an agent of Company, the Service, facility or Circuit is considered to be impaired but not interrupted. No credit allowance will be made for a Service, facility or Circuit considered by Company to be impaired. - E. If an Access Line is interrupted as the result of widespread disaster, and other than by the negligence or willful act of the Company, no refund shall be required unless the access line service remains interrupted for a period in excess of seven (7) days. 2.7. RESTORATION OF SERVICE

2.7.1. The use and restoration of Service in emergencies shall be in accordance with Part 64, Subpart D of the Federal Communications Commission's Rules and Regulations, which specifies the priority system for such activities.

2.7.2. When a Customer's Service has been disconnected in accordance with this Tariff and the Service has been terminated through the completion of a Company service order, Service will be restored only upon the basis of application for new Service.

2.7.3. Emergency/Crisis/Disaster/Restoration and Provisioning - Telecommunications Service Priority

A. General

1. The Telecommunications Service Priority (TSP) Program is a federal program used to identify and prioritize telecommunications services that support national security or emergency preparedness (NS/EP) missions.

NS/EP services are defined as those telecommunications services which are used to maintain a state of readiness or respond to and manage any event or crisis which causes or could cause injury or harm to the population, damage or loss to property, or degrades or threatens the NS/EP posture of the United States.

TSP restoration and/or provisioning shall be provided in accordance with Part 64, Appendix A of the Federal Communications Commission's Rules and Regulations (47 C.F.R.), and the "Service Vendor Handbook For The Telecommunications Service Priority (TSP) Program" and the "Service User Manual for the Telecommunications Service Priority (TSP) System" (NCS Manual 3-1-1) (Service User Manual) issued and updated as necessary by the Office of Priority Telecommunications (OPT) of the National Communications System. Any changes to or reissuance of these regulations or manuals supersede tariff language contained herein.

2.7. RESTORATION OF SERVICE, Continued

2.7.3. Emergency/Crisis/Disaster/Restoration and Provisioning - Telecommunications Service Priority, Continued

B. TSP Program Components

The TSP program has two components, restoration and provisioning.

1. A restoration priority is applied to new or existing telecommunications services to ensure restoration before any other services during a service outage. TSP restoration priorities must be requested and assigned before a service outage occurs.
2. A provisioning priority is obtained to facilitate priority installation of new telecommunications services during a service outage. Provisioning on a priority basis becomes necessary when an end-user has an urgent requirement for a new NS/EP service that must be installed immediately or by a specific due date that can be met only by a shorter than standard or expedited Company provisioning time frame. As a matter of general practice, existing TSP services will be restored before provisioning new TSP services.

C. TSP Request Process – Restoration

To request a TSP restoration priority assignment, a prospective TSP user must:

1. determine that the user's telecommunications service supports an NS/EP function under one of the following four TSP categories.
 - a. National Security Leadership
 1. National Security Posture and U.S. Population Attack Warning
 2. Public Health, Safety, and Maintenance of Law and Order
 3. Public Welfare and Maintenance of National Economic Posture.

C. TSP Request Process – Restoration, Continued

2. identify the priority level to be requested for the telecommunications service. The priority level is determined by the end-user's TSP category and service profile. The service profile defines the user's level of support to the portion of the telecommunications service that the user owns and operates, such as Customer Premises Equipment or wiring. The five levels of priority and seven element groups that define the service profile are contained in the Service User Manual.
3. Complete the TSP Request for Service Users form (SF 315) available on the National Communications System (NCS) website (<http://tsp.ncs.gov/>).
4. For non-federal users, have their TSP requests approved by a federal agency sponsor. Non-federal users should contact the OPT, at the NCS website (<http://tsp.ncs.gov/>), for information on identifying a sponsor for TSP requests.
5. Submit the SF 315 to the OPT.
6. Upon receipt of the TSP Authorization Code from the OPT, notify the Company, and include the TSP Authorization Code in any service order to the Company requesting restoration of NS/EP services.

D. TSP Request Process – Provisioning

1. To request a TSP provisioning priority assignment, a prospective TSP user must follow the same steps listed in 2.6.A.2(A)(1) above for restoration priority assignment except for the following differences. The user should:
 - a. certify that its telecommunications service is an Emergency service. Emergency services are those that support one of the NS/EP functions listed in 2.6.A.2(A)(1) above and are so critical that they must be provisioned at the earliest possible time, without regard to cost to the user.
 - b. verify that the Company cannot meet the service due date without a TSP assignment.
 - c. obtain approval from the end-user's invocation official to request a provisioning priority. Invocation officials are designated individuals with the authority to request TSP provisioning for a telecommunications service, and include the head or director of a federal agency, commander of a unified/specified military command, chief of a military service, commander of a major military command, or state governor.

E. Responsibilities of the End-User

End-users or entities acting on their behalf must perform the following:

1. Identify telecommunications services requiring priority.
2. Request, justify, and revalidate all priority level assignments. Revalidation must be completed every 2 years, and must be done before expiration of the end-user's TSP Authorization Code(s).
3. Accept TSP services by the service due dates.

5. Pay the Company any authorized costs associated with priority services.
6. Report to the Company any failed or unusable services with priority levels.
7. Designate a 24-hour point of contact for each TSP request and apprise the OPT.
8. Cooperate with the OPT during reconciliation (comparison of NS/EP service information and resolution of any identified discrepancies) and revalidation.

F. Responsibilities of the Company

The Company will perform the following:

1. Provide TSP service only after receipt of a TSP authorization code.
2. Revoke TSP services at the direction of the end-user or OPT.
3. Ensure that TSP Program priorities supersede any other telecommunications priority that may be provided (other than control services and order wires).

8. Ensure that all subcontractors complete reconciliation of TSP information with the service vendor.
9. Ensure that other carriers supplying underlying facilities are provided information necessary to implement priority treatment of facilities that support NS/EP services.
10. Assist in ensuring that priority level assignments of NS/EP services are accurately identified "end-to-end" by providing to subcontractors and interconnecting carriers the restoration priority level assigned to a service.
11. Disclose content of the NS/EP TSP database only as may be required by law.
12. Comply with regulations and procedures supplemental to and consistent with guidelines issued by the OPT.

G. Preemption

When spare facilities are not available, it may be necessary for the Company to preempt the facilities required to provision or restore a TSP service. When preemption is necessary, non-TSP services may be preempted based on the Company's best judgment. If no suitable spare or non-TSP services are available, the Company may preempt an existing TSP service to restore a TSP service with a higher restoration priority assignment. When preemption is necessary, prior consent of the service user whose service will be preempted is not required; however, the Company will make every reasonable effort to notify the preempted Customer of the action to be taken.

3.2. SERVICE PROVIDER OPTIONS

3.2.1. No Primary Interexchange Carrier (PIC) Option

3.2.3. Preferred Carrier Freeze (PCF)

Company offers a free Service called Preferred Carrier Freeze. This Service is available to all Customers. After the initial thirty (30) day period, or at any time after an initial Carrier selection has been made, any Carrier selection or change is subject to a Non-Recurring Charge, per change, per line, as set forth in Section 4.3.

4.1.1. InterLATA and IntraLATA presubscription is a procedure whereby a subscriber designates Company as the carrier which the subscriber wishes to be the carrier of choice for interLATA and intraLATA toll calls. Such calls are directed to the designated carrier, without the need to use carrier access codes or additional dialing. InterLATA and IntraLATA presubscription does not prevent a subscriber who has presubscribed to the same interLATA and intraLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative interLATA and intraLATA carrier on a per call basis.

4.1.2. InterLATA and IntraLATA Presubscription Offerings:

- A. Option A: Subscriber may select Company as the presubscribed carrier for intraLATA toll calls subject to presubscription;
- B. Option B: Subscriber may select an alternate interLATA and intraLATA toll carrier as the presubscribed carrier for intraLATA toll calls subject to presubscription;
- C. Option C: Subscriber may select a carrier other than Company for the subscriber's interLATA toll carrier as the presubscribed carrier for intraLATA toll calls subject to presubscription; or
- D. Option D: Subscriber may select no presubscribed carrier for intraLATA toll calls subject to presubscription which will require the subscriber to dial a carrier access code to route all intraLATA toll calls to the carrier of choice for each call.

4.1.3. Rules and Regulations

- A. Subscribers will retain their current dialing arrangements until they request that their dialing arrangements be changed.
- B. Subscribers may select either Options A, B, C or D, above, for intraLATA presubscription.
- C. Subscribers may change their selected Option and/or their presubscribed intraLATA toll carrier at any time.
