2.11 Payment Arrangements

2.11.1 Payment for Service

The Customer is responsible for payment of all charges for facilities and services furnished to the Customer. Charges for installations, physical changes, expedites, or for cancellation of orders are payable upon completion. If, because of any such activity a non-Company carrier or supplier levies additional charges, these charges shall be passed on to the Customer. Recurring charges are billed in advance of the month in which the service is provided.

2.11.2 Billing and Collection of Charges

The Company shall render a bill during each billing period to every Customer. The billing period shall be monthly. Non-recurring charges are due and payable from the Customer within (30) days after the invoice date, unless otherwise agreed to in advance. Billing will be payable upon receipt.

- (a) Except as otherwise provided in subdivision (b) of this Section, interest at the rate of 1.5% per month (unless proscribed by law, in which event, at the highest rate allowed by law) will accrue upon any unpaid amount commencing thirty (30) days after the date of billing.
- (b) For billing and collection purposes, every month is considered to have thirty (30) days.
- (c) When service does not begin on the first day of the month, or end on the last day of the month, service will be furnished and billed on a pro rata basis.

Billing and collection services may be provided by the Company or provided by others including the Customer's local exchange carrier on behalf of the Company. When billing and collection are the responsibility of the local exchange carrier or party other than the Company, Company shall assume no liability for any injury arising from the local exchange carrier's or other party's billing and collection practices. Payments owing by Customer under this Tariff may be offset so that only the net amount shall be paid by the Customer during the relevant period.

2.11.3 Advance Payments

To safeguard its interests, the Company may require a Customer to make an advance payment before services and facilities are furnished. Advance payment may be required by the Company for the construction of facilities and furnishing of special equipment or for temporary service for short-term use. In addition, where special construction is involved, the advance payment may also include an amount equal to the estimated non-recurring charges for the special construction and recurring charges (if any) for a period to be set between the Company and the Customer. An advance payment may be required in addition to a deposit.

2.11.4 Deposits

The Company may require Customer to make a deposit to be held as a guarantee for the payment of charges. A deposit does not relieve the Customer of the responsibility for the prompt payment of bills on presentation. A deposit may be required in addition to an advance payment. The deposit will not exceed an amount equal to two months estimated charges for a service. Company retains the right to request Customer to submit to Company updated financial information to ensure Customer's creditworthiness. Company may also require an additional deposit during the term of a Service Order based on changed circumstances. In addition, to satisfy Customer's payment responsibilities under the Tariff, Company require Customer to provide and maintain in effect during the term of any Service Order a confirmed, irrevocable letter of credit or other alternative form of security proposed by and acceptable to Company that is consistent with commercial practices and that adequately protects Company against the risk of Customer's non-payment. When a service is discontinued, the amount of a deposit, plus interest, will be applied to the Customer's account and any credit balance remaining will be refunded.

2.11.5 Surcharges and Taxes

The Customer is responsible for the payment of any local, state or federal sales, excise, access or other surcharges or taxes imposed on or based upon the provision, sale or use of services provided pursuant to this Tariff, unless otherwise exempt as a matter of law.

2.15 Emergency/ Crisis/ Disaster Restoration and Provisioning - Telecommunications Service Priority

2.15.1 General

- a. The Telecommunications Service Priority (TSP) Program is a federal program used to identify and prioritize telecommunications services that support national security or emergency preparedness (NS/EP) missions. NS/EP services are defined as those telecommunications services which are used to maintain a state of readiness or respond to and manage any event or crisis which causes or could cause injury or harm to the population, damage or loss to property, or degrades or threatens the NS/EP posture of the United States. TSP restoration and/or provisioning shall be provided in accordance with Part 64, Appendix A of the Federal Communications Commission's Rules and Regulations (47 C.F.R.), and the "Service Vendor Handbook For The Telecommunications Service Priority (TSP) Program" and the "Service User Manual for the Telecommunications Service Priority (TSP) System" (NCS Manual 3-1-1) (Service User Manual) issued and updated as necessary by the Office of Priority Telecommunications (OPT) of the National Communications System. Any changes to or reissuance of these regulations or manuals supersede tariff language contained herein.
- b. The TSP program has two components, restoration and provisioning.
 1. A restoration priority is applied to new or existing telecommunications services to ensure restoration before any other services during a service outage. TSP restoration priorities must be requested and assigned before a service outage occurs.
 2. A provisioning priority is obtained to facilitate priority installation of new telecommunications services during a service outage. Provisioning on a priority basis becomes necessary when an end-user has an urgent requirement for a new NS/EP service that must be installed immediately or by a specific due date that can be met only by a shorter than standard or expedited Company provisioning time frame. As a matter of general practice, existing TSP services will be restored before provisioning new TSP services.

2.15 Emergency/ Crisis/ Disaster Restoration And Provisioning - Telecommunications Service Priority (Cont'd)

2.15.2 TSP Request Process – Restoration

To request a TSP restoration priority assignment, a prospective TSP user must:

- a. Determine that the user's telecommunications service supports an NS/EP function under one of the following four TSP categories.
 1. National Security Leadership
 2. National Security Posture and U.S. Population Attack Warning
 3. Public Health, Safety, and Maintenance of Law and Order
 4. Public Welfare and Maintenance of National Economic Posture
- b. Identify the priority level to be requested for the telecommunications service. The priority level is determined by the end-user's TSP category and service profile. The service profile defines the user's level of support to the portion of the telecommunications service that the user owns and operates, such as customer premises equipment or wiring. The five levels of priority and seven element groups that define the service profile are contained in the Service User Manual.
- c. Complete the TSP Request for Service Users form (SF 315) available on the National Communications System (NCS) website (<http://tsp.ncs.gov/>).

For non-federal users, have their TSP requests approved by a federal agency sponsor. Non-federal users should contact the OPT, at the NCS website (<http://tsp.ncs.gov/>), for information on identifying a sponsor for TSP requests.
- d. Submit the SF 315 to the OPT.
- e. Upon receipt of the TSP Authorization Code from the OPT, notify the Company, and include the TSP Authorization Code in any service order to the Company requesting restoration of NS/EP services.

To request a TSP provisioning priority assignment, a prospective TSP user must follow the same steps listed in 2.15.2.a. -- 2.15.2.e above for restoration priority assignment except for the following differences. The user should:

- a. Certify that its telecommunications service is an Emergency service. Emergency services are those that support one of the NS/EP functions listed in 214.2.a. above and are so critical that they must be provisioned at the earliest possible time, without regard to cost to the user.
- b. Verify that the Company cannot meet the service due date without a TSP assignment.
- c. Obtain approval from the end-user's invocation official to request a provisioning priority. Invocation officials are designated individuals with the authority to request TSP provisioning for a telecommunications service, and include the head or director of a federal agency, commander of a unified/specified military command, chief of a military service, commander of a major military command, or state governor.

2.16 Critical Facilities Administration

2.16.1 Program Overview

- a. Facilities-based carriers are responsible to provide data on the physical path of qualified circuits to customers who request such information. Such carriers are required to maintain facilities associated with qualified circuits in such a manner as to ensure that notification of a change in the physical routing of a qualifying circuit is communicated quickly to the affected customer, and the physical path data promptly updated. Such carriers will maintain the data and establish appropriate methods of identification and authentication to secure the data and restrict access by each customer to information relative to that customer's qualifying circuits.
- b. Customers are required to demonstrate for each qualifying circuit that the circuit has been registered under the federal Telecommunications Service Priority program in order to participate.

2.16.2. Customer Obligations

Customers participating under the Critical Facilities Administration program will be required to:

- a. Identify critical facilities by enrolling circuits in the federal Telecommunications Service Priority program, and demonstrating the sponsorship of a federal agency supporting the designation of those circuits as qualifying under the federal Telecommunications Service Priority program. Such circuits will be referred to as "qualifying circuits."
- b. Subscribe to the Critical Facilities Administration service offered by their carrier, and identify which qualifying circuits it wishes to enroll in the service. Such circuits will be referred to as "subscribed circuits."

3.4 Trouble Isolation Charges,

The Trouble Isolation Charge applies for time spent on a Customer's premises by a Company employee or its agent during which it is determined that a service difficulty or trouble reported results from Customer-provided terminal equipment and/or communications systems.

When a Customer reports trouble to the Company for clearance and no trouble is found in the Company's facilities, the Customer may be responsible for payment of a charge calculated from the time Company personnel are dispatched to the Customer Premise until the work is completed. Failure of Company personnel to find trouble in the Company's facilities will result in no charge if the trouble is actually in those facilities but not discovered at that time.

The Customer may be responsible for payment of charges when the Company dispatches personnel to the Customer's premises and the trouble is in equipment or communications systems provided by other than the Company

Charges will be made at the Company's current labor rates including appropriate overheads and are subject to overtime and premium time for work outside of normal Company hours. Charges will be based on a minimum of four hours.

The level of discount will be based on an eligible school or library's level of economic disadvantage and by its location in either an urban or rural area. A schools level of economic disadvantage will be determined by the percentage of its students eligible for participation in the national school lunch program, and a library's level of economic disadvantage will be calculated on the basis of school lunch eligibility in the public school district in which the library is located. A non-public school may use either eligibility for the national school lunch program or other federally approved alternative measures to determine its level of economic disadvantage. To be eligible for the discount, schools and libraries will be required to comply with the terms and conditions set forth in the Rules. Discounts are available only to the extent that they are funded by the federal universal service fund. Schools and libraries may aggregate demand with other eligible entities to create a consortium.
