SECTION 4 - INTRALATA MESSAGE TOLL SERVICE

4.1 GENERAL

4.1.1 Description

Message Toll Service is available to Customers who originate direct dialed calls over switched or dedicated access lines. No minimum volume commitment is required.

- A. Unless otherwise indicated, all calls are billed in one minute increments after an initial call duration of one minute. All calls which are fractions of a minute are rounded up to the next whole minute.
- B. Call timing ends when the calling station "hangs up," thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends when the network connection is released either by automatic timing equipment in the telephone network or by the Company operator.

4.2 CALL CHARGES

4.2.1 Switched Toll Service

Calls originate over standard switched access lines which are presubscribed to the Company's service. Calls are billed in one-minute increments after an initial minimum call duration of one minute.

- A. IntraLATA rates:

Per Minute Usage Rate	Minimum	Maximum
All Times of Day	\$0.01	\$0.15
