# SECTION 16 - SERVICE AVAILABILITY AND RATING INFORMATION

### V&H Coordinate Method of Determining Airline Mileage 16.2

For Access Services and Network Interconnection Services provided under this tariff, the airline mileage between any two wire centers is determined as follows:

- 1 Obtain the "V" and "H" coordinates for each wire center from the NECA Tariff F.C.C. No. 4.
- Compute the difference between the "V" coordinates of the two wire centers; and the difference between the two "H" coordinates.
- Square each difference obtained in step (2) above. 3
- Add the square of the "V" difference and the square of the "H" difference obtained in step (3).
- Divide the sum of the squares by 10. Round to the next higher whole number if any fraction is obtained.
- Obtain the square root of the whole number result obtained above. Round to the next higher whole number if any fraction is obtained. This is the airline mileage.

7 Formula = 
$$\sqrt{1 - \frac{V2}{1}^2 + (H1 - H2)^2}$$
