SECTION 5: EXCHANGE ACCESS SERVICE

5.1 General

Exchange Access Service provides a Customer with a telephonic connection and a unique telephone number address on the public switched telecommunications network. Each Exchange Access Service enables users to:

- A) receive calls from other stations on the public switched telecommunications network;
- B) access other services offered by the Company as set forth in this tariff;
- C) access certain interstate and international calling services provided by the Company;
- D) access (at no additional charge) the Company's operators and business office for service related assistance;
- E) access (at no additional charge) emergency services by dialing 0- or 9-1-1; and
- F) access services provided by other common carriers which purchase the Company's Switched Access services as provided under the Company's Federal and State tariffs, or which maintain other types of traffic exchange arrangements with the Company.
- G) Exchange Access Service can be used to originate calls to other telephone companies' caller-paid information services (e.g. NPA 900, NXX 970, 540, etc. Calls to numbers "NXX 976" will not be blocked unless otherwise specified by the Customer at the time service is ordered. The Customer assumes full responsibility for any payment if they originate calls to caller-paid or pay per call information services.

SECTION 5: EXCHANGE ACCESS SERVICE

5.1 General (cont'd.)

Each Exchange Access Service is available on a "Full" service basis, whereby service is delivered to a demarcation/connection block at the customer's premises. Monthly access rates for network access lines are determined by class of service.

The following Exchange Access Services are offered:

- Basic Line Service (both Residential and Business)
- Basic Trunk Service
- DID Trunk Service
- Digital Trunk Service
- ISDN Primary Rate Interface (PRI) Service

5.2 End User Common Line (EUCL) Charge

End User Common Line Charges as filed for the State of New York in Focal Communications Corporation tariff FCC #1 will be applicable to all end users.

SECTION 5: EXCHANGE ACCESS SERVICE

5.3 Basic Line Service

Basic Line Service provides a Customer with a single, voice-grade telephonic communications channel which can be used to place or receive one call at a time. Basic Lines are provided for connection of Customer-provided single station sets or facsimile machines to the public switched telecommunications network. Each Basic Line may be configured into a hunt group with other Company-provided Basic Lines. Each Basic Line is provided with the following standard features which can be deleted at the Customer's option:

Touch Tone
Call Waiting
Call Forwarding
Three-Way Conference Calling

Non-recurring and Recurring charges per Basic Line apply as follows:

<u>Non-Recurring Charge</u>	<u>Recurring Charge</u>

SECTION 5: EXCHANGE ACCESS SERVICE

5.5 Basic Trunk Service

Basic Trunk Service provides a Customer with a single, voice-grade telephonic communications channel which can be used to place or receive one call at a time. Basic Trunks are provided for connection of Customer-provided private branch exchanges (PBX) to the public switched telecommunications network. Each Basic Trunk is provided with touch tone signaling and may be configured into a hunt group with other Company-provided Basic Trunks.

For trunks equipped with Direct Inward Dial (DID) capability and DID numbers, see Sections 5.6 & 5.7.

Non-recurring and Recurring charges per Basic Trunk apply as follows:

<u>Non-Recurring Charge</u>	<u>Recurring Charge</u>
\$500.00	\$23.47

Customers of Basic Line Service may select optional feature Caller Name and Number Delivery for an additional monthly charge. Prior to sending the originating telephone number to a Customer's display unit, the Company will associate that number with an electronic white pages listing, thereby transmitting both the originating number and the associated directory listing.

All Access Areas Monthly Recurring Charge for Calling Name and Number Delivery \$6.00 per line

SECTION 5: EXCHANGE ACCESS SERVICE

5.6 DID Trunk Service

DID Trunk Service provides a Customer with a single, voice-grade telephonic communications channel which can be used to receive incoming calls one call at a time. DID Trunk Service transmits the dialed digits for all incoming calls allowing the customer's PBX to route incoming calls directly to individual stations corresponding to each individual DID number. Charges for DID number apply in addition to the DID Trunk charges listed below.

T

Non-recurring and Recurring charges per DID Trunk apply as follows:

SECTION 5: EXCHANGE ACCESS SERVICE

5.7 Digital Trunk Service

Digital Trunk Service provides a Customer with a digital connection operating at 1.544 Mbps which is time division multiplexed into 24 individual voice-grade telephonic communications channels, each of which can be used to place or receive one call at a time. Digital Trunks are provided for connection of compatible Customer-provided private branch exchanges (PBX) to the public switched telecommunications network. Each Digital Trunk is provided with dual tone multi-frequency (DTMF) or multi-frequency (MF) signaling, as specified by the Customer. Digital Trunks may be configured into hunt groups with other Company-provided Digital Trunks. The terminal interface for each Digital Trunk Service is a DSX-1 panel.

Individual channels carried over a Digital Trunk may be equipped with Direct Inward Dial (DID) capability. Any building fed by the fiber optics of Teleport Communications Group or MCIWorldcom is considered On-Net; everything else is considered Off-Net. Additional charges for DID numbers are set forth in Section 6.2.

5.7 Digital Trunk Service (cont'd.)

Other charges per Digital Trunk per point apply as follows:

	<u>Monthly Recurring</u>	<u>Non-Recurring</u>
Digital T1 & PRI Installation Charges	N/A	\$500.00
DID Numbers each	\$0.02	\$2.50
Channelized DIDs (per channel)	\$20.00*	N/A

C

Customer may, at its option, procure links directly from another service provider other than Focal while subscribing to Focal port elements.

* Channelized DIDs are not discounted as the number of T1s increase.

5.8 ISDN Primary Rate Interface (PRI) Service

Focal ISDN PRI is a competitive digital business telecommunications service offered to all customers located within New York LATA 132. ISDN PRI is a switched service that provides the end user with clear channel signaling (64Kbs) in increments of 24 channels formatted within a T1 (1.544 Mbps) allowing such uses as carrying voice traffic, packetized data, or acting as common trunks. Focal ISDN PRI end users will connect their CPE equipment to Focal's central office via T1 connections.

All Customer Provided Equipment (CPE) used with Focal ISDN PRI is required to conform with the Bellcore Technical Reference Specifications as used by Focal: ISDN Primary Rate Access Transport System Requirements (a module of TSGR, FR-440), Issue Number 01; Technical Reference: TR-TSY-000754.

5.8.1 Standard Features for Circuit Switched Voice and Circuit Switched Data Services

A) Call by Call for Trunk Groups

Allows Circuit Switched Voice and Circuit Switched Data Services to enable over the Focal ISDN PRI trunk to share "B" channels and arrange them as a single trunk group.

This allows incoming and outgoing Circuit Switched Voice and Data calls to utilize "B" Channels on a call by call basis. (Without this capability, each service would require "B" channel.) "B" Channel Packet Switched Data Service cannot utilize this capability. ISDN PRI provides the end user with fractional T1 capabilities by using multiple B channels as required to support the request for aggregate bandwidth of each application thus using SS7 interconnection trunks between Focal and New York Bell Telephone Company. All of the 23 channels (24 where technology permits) are usable as stand

5.8 ISDN Primary Rate Interface (PRI) Service (cont'd.)

5.8.1 Standard Features for Circuit Switched Voice and Circuit Switched Data Services (cont'd)

A) (cont'd)

alone trunk groups. Trunk groups can be equipped with Direct Inward Dial (DID) functionality.

B) Caller Name and Number Delivery (Caller ID) Capability

T

All calling numbers presented to the services working on the ISDN PRI connection can be delivered to the customer's CPE, including calls made to Direct Inward Dialing Service telephone numbers.

C) Clear Channel Capability

ISDN PRI uses a standard 23b +D channel format providing "B" channels solely used for customer applications, since all signaling and control functions are handled by the "D" channel. This allows up to 64 Kbps access on each "B" channel and multiple B channels can be configured together in order to satisfy bandwidth requirements required to pass customer information to distant end terminations where technically feasible via Focal ISDN PRI connections. ISDN PRI also allows multiple T1s to be configured as one user group using a single D channel for signaling support thus increasing available bandwidth.

D) Digital Voice Transmission

All voice calls are converted from an analog into a digital format to be transported across the network.

E) "D" Channel Control of Multiple Prime

Utilizes a single "D" channel to provide signaling and control for multiple ISDN PRI connections within a defined group. This allows the end user an additional bandwidth of 1.544 Mbs for each additional PRI port connection.

F) Equal Access Calling

Allows the customer to predefine an interexchange carrier or randomly access an interexchange carrier for each Trunk Group enabled. The carrier designation can be changed for charges as filed for the State of New York with the F.C.C. in Focal Communications Corporation Tariff F.C.C. No. 1.

SECTION 5: EXCHANGE ACCESS SERVICE

5.8 ISDN Primary Rate Interface (PRI) Service (cont'd.)

5.8.2 Optional Features for Circuit Switched Voice and Circuit Switched Data Services

A) Backup "D" Channel Arrangement

Provides backup for a primary "D" channel under those circumstances where multiple ISDN Prime connections share a "D" single channel. A predetermined "D" channel on another PRI connection would automatically take over call control and signaling functions.

	Monthly Recurring Charge	Non Recurring Charge
D-Channel	\$50.00	\$50.00

N
|
N

B) System Intercommunication Service

Allows Focal ISDN PRI "B" channels to connect to a Centrex business system or another Focal ISDN PRI that originates in the same central office. This feature is offered on a per trunk group basis only.

Rate: Individual Case Basis (ICB)

C) Call by Call for FX and Tie Lines

Allows Foreign Exchange (FX) and Tie Line calls to be directed to and originated from ISDN PRI "B" channels. This provides Call by Call service selection for incoming and outgoing Circuit Switched and Private Facility services.

Rate: Individual Case Basis (ICB)

D) 2B Channel Transfer

Allows the Customer's CPE to more efficiently use PRI trunk connections for ISDN calling. If an inbound call is forwarded or transferred using two channels in a PRI, the channels that were used to make the connection can be dropped and made available to future calls.

Monthly Recurring: \$75.00

Non-Recurring: \$100.00

5.11 Virtual Exchange Service

5.11.1 Description

Virtual Exchange is an inbound foreign exchange (FX) service. The Company assigns telephone numbers (NPA-NXX-XXXX) from a foreign rate center outside the subscriber's geographic exchange area. Virtual Exchange service must terminate on Focal provided DID, DIOD, 2-way or ISDN PRI access facilities.

Virtual Exchange customers must subscribe to Focal DID, DIOD, 2-way or ISDN PRI service and maintain a BTN (Billing Telephone Number) from within their home rate center. Virtual Exchange service is an inbound only feature. All outbound calls originated from a Virtual Exchange customer will be charged at applicable usage rates based upon the customer's home rate center.

Virtual Exchange numbers are available only from existing Focal service areas as defined in this tariff.

5.16 Integrated Voice and Data Service

T

T

5.16.1 Integrated Voice and Data Service – DS3 Level

Integrated Voice and Data Service – DS3 Level (IVADs3) is a channelized DS3 facility that will allow a customer to combine both voice and data DS1s onto a single DS3 circuit. Voice circuits can be either digital DS1 or ISDN PRI

in any standard format offered by the Company in this tariff.¹ Bandwidth for the data portion of this service is limited to 20Mbps per circuit. A minimum of nine DS1s is required for this service. The circuits can be any combination of data and voice DS1s. The DS1s on an IVADs3 circuit cannot be further multiplexed or channelized to a DS0 service level. Usage charges as listed in section 8.3 of this tariff also apply.

	<u>1 Year</u>	<u>2 Year</u>
<u>Base Price, per T1 (Initial 9 T1's)</u>	\$770	\$700
<u>Additional T1's per T1</u>		
10 - 14	\$539	\$490
15 - 19	\$407	\$370
20 - 24	\$308	\$280
25 - 28	\$231	\$210

5.16.2 This option provides for the installation by the Company of the customer premise equipment including configuration, management and on going maintenance. The Company will maintain the ownership of any customer premise equipment.

SECTION 5: EXCHANGE ACCESS SERVICE

5.17 Fractional Integrated Voice and Data Service PRI (IVAD PRI)

5.17.1 Description

IVAD Fractional PRI allows a customer to utilize an ISDN PRI Service in fractional arrangements. All voice and data service options currently offered for IVAD PRI will be offered with IVAD Fractional PRI. IVAD service is available in different groups of channels and at varying bandwidth speeds. Fractional IVAD is available in groups of 12, 16 & 20.

5.17.2 Pricing

IVAD Fractional PRI is priced the same as the IVAD Digital T1 service as listed in Section 5 page 20.1 of tariff PSC 3.

SECTION 5: EXCHANGE ACCESS SERVICE

5.12 Integrated Voice and Data Service – Trunk Option

T

Focal's IVAD Trunk service options provide Direct Inward Dialing (DID) capabilities for inbound calling. DIDs allow customers to oversubscribe voice channels for inbound calls on their telephone system (PBX or Key System). Customers will order the Focal Trunk service option that relates to the configuration or interface of the customer's telephone system. The charges for number of channels and bandwidth levels as listed for IVAD DS1 service will apply, along with a trunk charge. Installation charges as listed for IVAD DS1 service will also apply.

Circuit	Trunk Charge
Digital T1	\$25 MRC per circuit
PRI	\$75 MRC per circuit
Analog DID	\$50
MRC	Per circuit

Rules and Regulations

- At all times, the Focal Outbound (DOD) promotion is subject to the terms and conditions of this tariff.
- The Customer's order is not to exceed three (3) Focal Outbound DOD T1s per service address.
- Promotional pricing is available for only six (6) months prior to the signing of a Master Service Agreement (MSA), and it begins on the date of installation. The Customer may extend the promotional pricing for up to twelve (12) months only upon signing an MSA. Focal reserves the right to discontinue service at the end of six (6) months without a signed MSA. If an MSA is not signed upon the completion of the six (6) month promotional time period, Focal reserves the right to charge standard tariff rates.
- Focal reserves the right to audit any usage commitment and charge standard tariff rates if the usage commitment is not met during the promotional period.
- Upon signing an MSA, any Non-Recurring Charges paid will be credited to the Customer.
- Promotional pricing is available for new service and not as a replacement of existing service.
