## SECTION 14: GRANDFATHERED SERVICES

### 14.2 Asymmetrical Digital Subscriber Line (ADSL)

#### Description

Asymmetrical Digital Subscriber Line (ADSL) Service provides a customer with high speed Internet access in one of two configurations. ADSL is available either 768 kbps upstream and 128 kbps downstream or 1.5 Mbps upstream and 512 kbps downstream. This service is provisioned on ILEC-provided unbundled network elements (UNEs) and is currently available as facilities permit. Performance of the transmission speeds is dependant on various factors including the distance of the customer's location from the central office and the quality of the UNE provided by the ILEC. It is the customer's responsibility to secure the ISP connectivity that is required for this service. A separate service charge will apply if a customer chooses to downgrade their service from the next higher speed.

#### 14.2.1

#### 14.2.2 Monthly recurring charges

Option 1: 768 kbps x 128 kbps, per line

	<u>1 year</u>	<u>2 years</u>
Data	\$80.00	\$75.00
Data & Voice	\$75.00	\$70.00

Option 2: 1.5 Mbps x 512 kbps, per line

	<u>1 year</u>	<u>2 years</u>
Data	\$55.00	\$50.00
Data & Voice	\$50.00	\$45.00

#### 14.2.3 Usage

#### SECTION 14: GRANDFATHERED SERVICES

- 14.3 A voice option is also available with this service. This option, Voice over Digital Subscriber Line (VODSL) has the capability to provide simultaneous voice and data services over a single Digital Subscriber Line. The end user has the choice to include up to 16 voice channels in the service, depending on the type of customer premise equipment used. All standard verticle calling features currently offered by The Company can be supported on the voice channels. Voice and data will share the bandwidth of the Digital Subscriber Line. There is an additional per voice channel, non-recurring charge with the voice option.

##### 14.3.1 Rates

###### Monthly recurring charges

Speed up to 208 kbps	Data and voice \$ 94
416 kbps	Data and voice \$128
784 kbps	Data and voice \$162
